

CY14-1B series Axial Piston Pump & Motor

Ordering code:

63	M	C	Y	14	-	1 B	F
----	---	---	---	----	---	-----	---

Blank= clockwise
F= anti-clockwise

1=structure design number
B=second improved design

Type: cylinder rotational axial piston pump

Y=pump
M= motor

Pressure rate: 31.5 MPa (315 bar)

M= fixed displacement
Y= pressure compensation variable
B= better solution proportion control variable
C= servo variable
P= constant pressure variable
D= electric drive variable
MY= grade pressure compensation variable

Nominal displacement (ml/rev.): 2.5, 10, 25, 40, 63, 80, 160, 250,400.
